

Quality Wire

Each of our EDM wires are manufactured within a multi-step quality control plan to ensure impurity-free material, precision dimensional accuracy and smooth surface finishes to exhibit stable and repeatable cutting. All wires have been tested across many different EDM machines for optimal performance.

For other EDM wire needs, please contact our sales team.

Standard Brass 900

- The benchmark for wire EDM machines.
- Recommended for all standard machining.
- Competitively priced: Use for any application where a lower cost wire is appropriate.

Deltacut 900 Zinc Coated

- Increase productivity while reducing costs
- Good for machining parts with tapered angles
- Enhanced flushing and better surface finish
- Patented technology

BRASS EDM WIRE

Type	Quality	Diameter (in)			Tensile Strength	Spool Sizes (lbs)
Standard Brass 900	Hard	0.008	0.010	0.012	900 N/mm2 130,000± psi	8.8, 13.2, 17.5, 22, 35.2, and 44
Deltacut 900 Zinc Coated	Hard	0.008	0.010	0.012	900 N/mm2 130,000± psi	11, 13.2, 17.5, 22, 35, and 44
